Introduction

I am a third-year student at the Budapest University of Technology and Economics, specializing in intelligent networks. Throughout my studies, I have developed a strong understanding of LTE, System Architecture Evolution (SAE), it's components, interfaces and related protocols such as GTP, X2 etc. I have also gained foundational knowledge in networking protocols, including TCP, UDP, and IP, etc.

In addition to my networking knowledge, I have hands-on experience with containerization technologies, specifically Docker and Kubernetes, and am familiar with AWS architecture. Recently, I completed courses focused on APIs and utilized Cloud9 in an exemplary project, which allowed me to enhance my coding skills and gain practical experience in cloud development.

I am quick to adapt to new technologies and environments and have a strong desire to learn. I am excited about the opportunity to apply my technical skills and enthusiasm for cloud technologies in a collaborative environment.

Studies

Budapest University of Technology and Economics

Degree in progress, Mérnökinformatikus 2022 Sep - In progress, Hungary

Skills

Computer, IT skills

AWS • Docker • Linux • Java • C# • C++ • Kubernetes • Git • bash scripting • Declarative Programming • 00 paradign

Competences, soft skills

Teamwork • Networking

Hobbies, interests, extra activities

I enjoy playing basketball, which not only positively impacts my physical fitness but also enhances my teamwork skills. Through basketball, I have learned the importance of collaboration, communication, and the collective development of strategies. Additionally, I love to engage in various sports and spend quality time with my loved ones, which helps maintain my mental wellbeing and strengthen my relationships.
